Type: ROUTINE INSPECTION

Date: 04-JUN-2024

3.7 Direct

Compatible grouping.

A female beagle (ID#1223812) had a fresh wound on the medial surface of the right forefoot, and a fresh puncture wound on the upper surface of the left forearm. This dog was housed with two other beagles, and bowls of food were present. A sign on the front of the enclosure stated that "12238212 has been food aggressive with old pen mates" and recommended feeding her separately. Dogs with a history of food aggression should not be fed as part of a group. The beagle's wounds must be treated by a licensed veterinarian, and she should be fed separately from the other dogs from this point on.
Correct by: 6 June 2024

This inspection and exit interview were conducted with facility representative.
